

Membership Prospectus 2026-27

About the Infrastructure Sustainability Council

Established in 2008, the Infrastructure Sustainability Council (ISC) is a peak body dedicated to advancing sustainability policy and practice in infrastructure.

We work closely with government and industry to embed sustainability in every aspect of our horizontal built environment to benefit people living in Australia and Aotearoa New Zealand.

Our members represent the entire value chain of infrastructure including investors, policy makers, asset owners and operators, delivery partners and the supply chain.

The ISC has certified the sustainability performance of over 415 infrastructure assets valued at close to \$390 billion from all infrastructure sectors – transport, communications, water, energy, waste, social and blue and green infrastructure.

To speak with us about joining our membership community, contact:

A message from our CEO

Welcome to the Infrastructure Sustainability Council

Toby Kent, Chief Executive Officer

The Infrastructure Sustainability Council works with members towards delivering a better future - a future in which society is powered by connected infrastructure that enables people to thrive on a healthy planet.

Climate change and biodiversity loss continue to threaten ecosystems, economies and the well-being of us all. And yet, in a world of competing priorities, the integration of sustainable policy, procurement and practice cannot be taken for granted in the decision-making of infrastructure investors, planners, owners and operators.

The ISC helps members to make more informed decisions at all stages along the lifecycle of infrastructure, from ideation to decommissioning. Our resources and programs support improved productivity and provide the spark and space for collaboration and impact.

The ISC is the industry voice to policymakers and procurers.

We understand that labour shortages, rising costs and productivity challenges put tremendous strain on the imperative to consider whole-of-life benefits. Our role is to advocate on your behalf, and to communicate that, in fact, adopting a sustainability approach and verifying outcomes reduces both risk and cost, in the near and long term.

By joining ISC you'll strengthen that message.

Thank you for considering membership. Our frameworks, tools, events and capability building programs would not be industry-leading and globally recognised were it not for the contribution and dedication of our members and partners.

We look forward to working with you in support of your ambition and to accelerate the better outcomes you are seeking to deliver.

Our purpose

Enabling connected infrastructure that supports people to thrive on a healthy planet

Our vision

Infrastructure in society is planned, delivered and operated as a connected system of assets delivering benefit at scale.

People are living safer, better lives because infrastructure supports and promotes social equity.

The planet is healthier because infrastructure is designed, built, operated and repurposed according to circularity principles.

Our impact

Our FY25 annual Impact Report provides an overview of our recent work; explore [here](#).

How we're delivering

Industry insights and knowledge

Through data, insights and education, we elevate the industry's capabilities and decision-making.

Market and community confidence

By working with industry to set standards that are independently verified, we grow trust and confidence that infrastructure is sustainable.

Communities of practice and networks

We catalyse innovation and share best practice by bringing together all parts of the infrastructure ecosystem.

Thought leadership and policy positions

We advocate for powerful changes to policy and practice that deliver benefits at scale.

Connected infrastructure for people and planet

Enabling Systems

Sustainable Finance

ROI optimisation for financiers and developers from the private and public sectors.

Verified Data

Third-party verified inputs to feed into project oversight, mandatory & voluntary disclosures.

Supportive Systems

Water, Energy and Waste

The plant and pipes associated with water and sewerage, power generation and transmission, and waste assets.

Connective Systems

Transport

Fixed components of the transport system – road, rail and cycle networks, ports, harbours and airports.

Communications

Digital and communications networks and structures that support the transmission of data.

Natural Systems

Blue Assets

Beaches, waterways, pools and the infrastructure that supports their use.

Green Assets

Natural and human made landscapes and vegetation and the ecosystem benefits they provide.

Why become a member of ISC?

ISC Membership is specifically designed to enhance your impact, influence and visibility.

Collaboration and Connection

Capability and Capacity

Advocacy and Influence

Leadership and Insights

Proponents, Investors and Policy Makers

Deliver optimal outcomes for the communities you serve and accelerate the performance of your assets to reduce risk and cost.

Delivery Partners

Build your expertise and capacity by being central to the network of changemakers who incentivise collaboration, innovation and knowledge sharing for impact.

Supply Solutions

Position your sustainability driven products and services in the direct line of sight of infrastructure project teams and asset owners while advocating for sustainable procurement policy and practice.

Knowledge and Networks

Amplify your impact and industry engagement by supporting an interconnected infrastructure sector that is powered by evidence, transparency and accountability.

Member Program

Opportunities to collaborate, advocate, educate and accelerate

Join a Member Committee

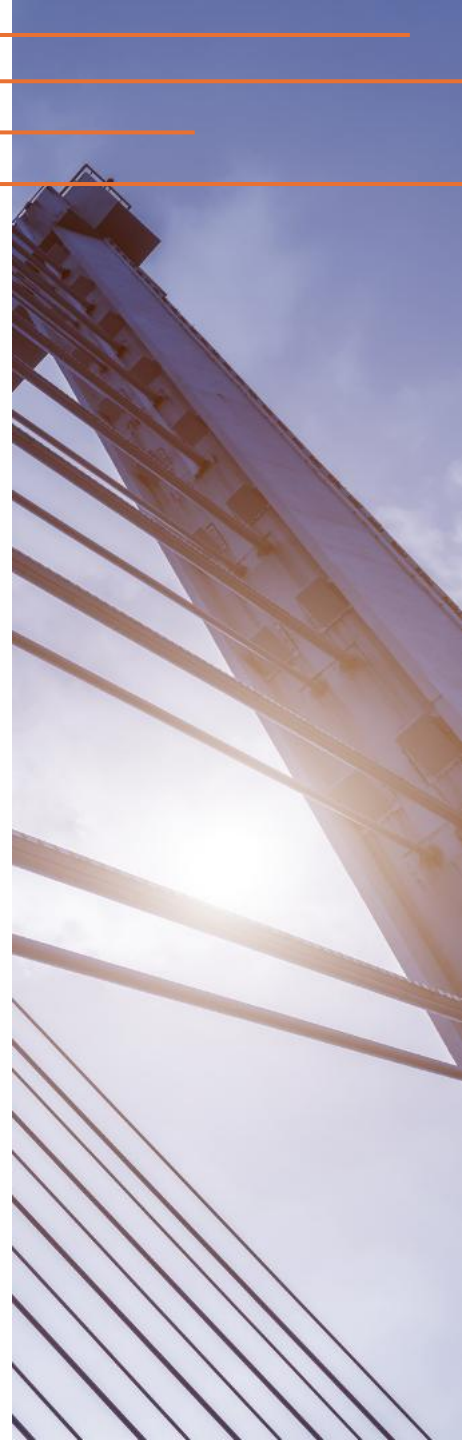

- › Policy & Advocacy Committee
- › Capability Committee
- › Contractors Committee
- › Sustainable Procurement Committee
- › Modern Slavery Committee
- › AI & Digital Committee
- › Sustainable Finance Committee
- › Technical Committees:
 - ‹ Planning
 - ‹ Design & As-Built
 - ‹ Operations.

Partner on Thought Leadership

- Leverage your relationship with the peak body for sustainable infrastructure by applying your expertise to the production of a thought leadership piece or event
- › Co-curate a roundtable as part of the ISC-Suite Leadership Event series
- Recent reports produced in collaboration with members include:
- › *Towards a Nature Positive Future for the Water Sector.* In partnership with ISC member: Jacobs
 - › *Legacies that last: Creating social value through Australia's infrastructure and built environment.* In partnership with ISC member: WSP

Showcase your Expertise

- › Speaking opportunities at ISC events
- › Present as part of an ISC webinar including:
 - ‹ Spotlight on the Supplier series
 - ‹ IS Ratings project case study series
 - ‹ Impact Theme series
- › Recognition of excellence at ISC Annual Gala Awards
- › Dedicated member webpage and announcement
- › Amplify your content via ISC digital channels
- › Event hosting and partnerships
- › Product and service listings on the ISupply Directory.

Member Program

Opportunities to collaborate,
advocate, educate and accelerate

Lift your Internal Capability

- › Access to IS Foundations e-learning module for your entire team - a practical resource to raise your internal team's understanding of infrastructure sustainability
- › 33% discount on any ISC course or workshop
- › Access to RISE - the only mentoring program specifically designed to develop infrastructure sustainability leadership.

Gain Verified Performance Insights

- › 30% discount on registration and annual support fees applicable to projects undertaking IS Ratings
- › Access to performance data to track, compare and quantify your sustainability performance.

Influence the Future of IS

- › Shape the direction of the ISC with your vote at the Annual General Meeting
- › Eligibility to apply to join the Board of Directors.

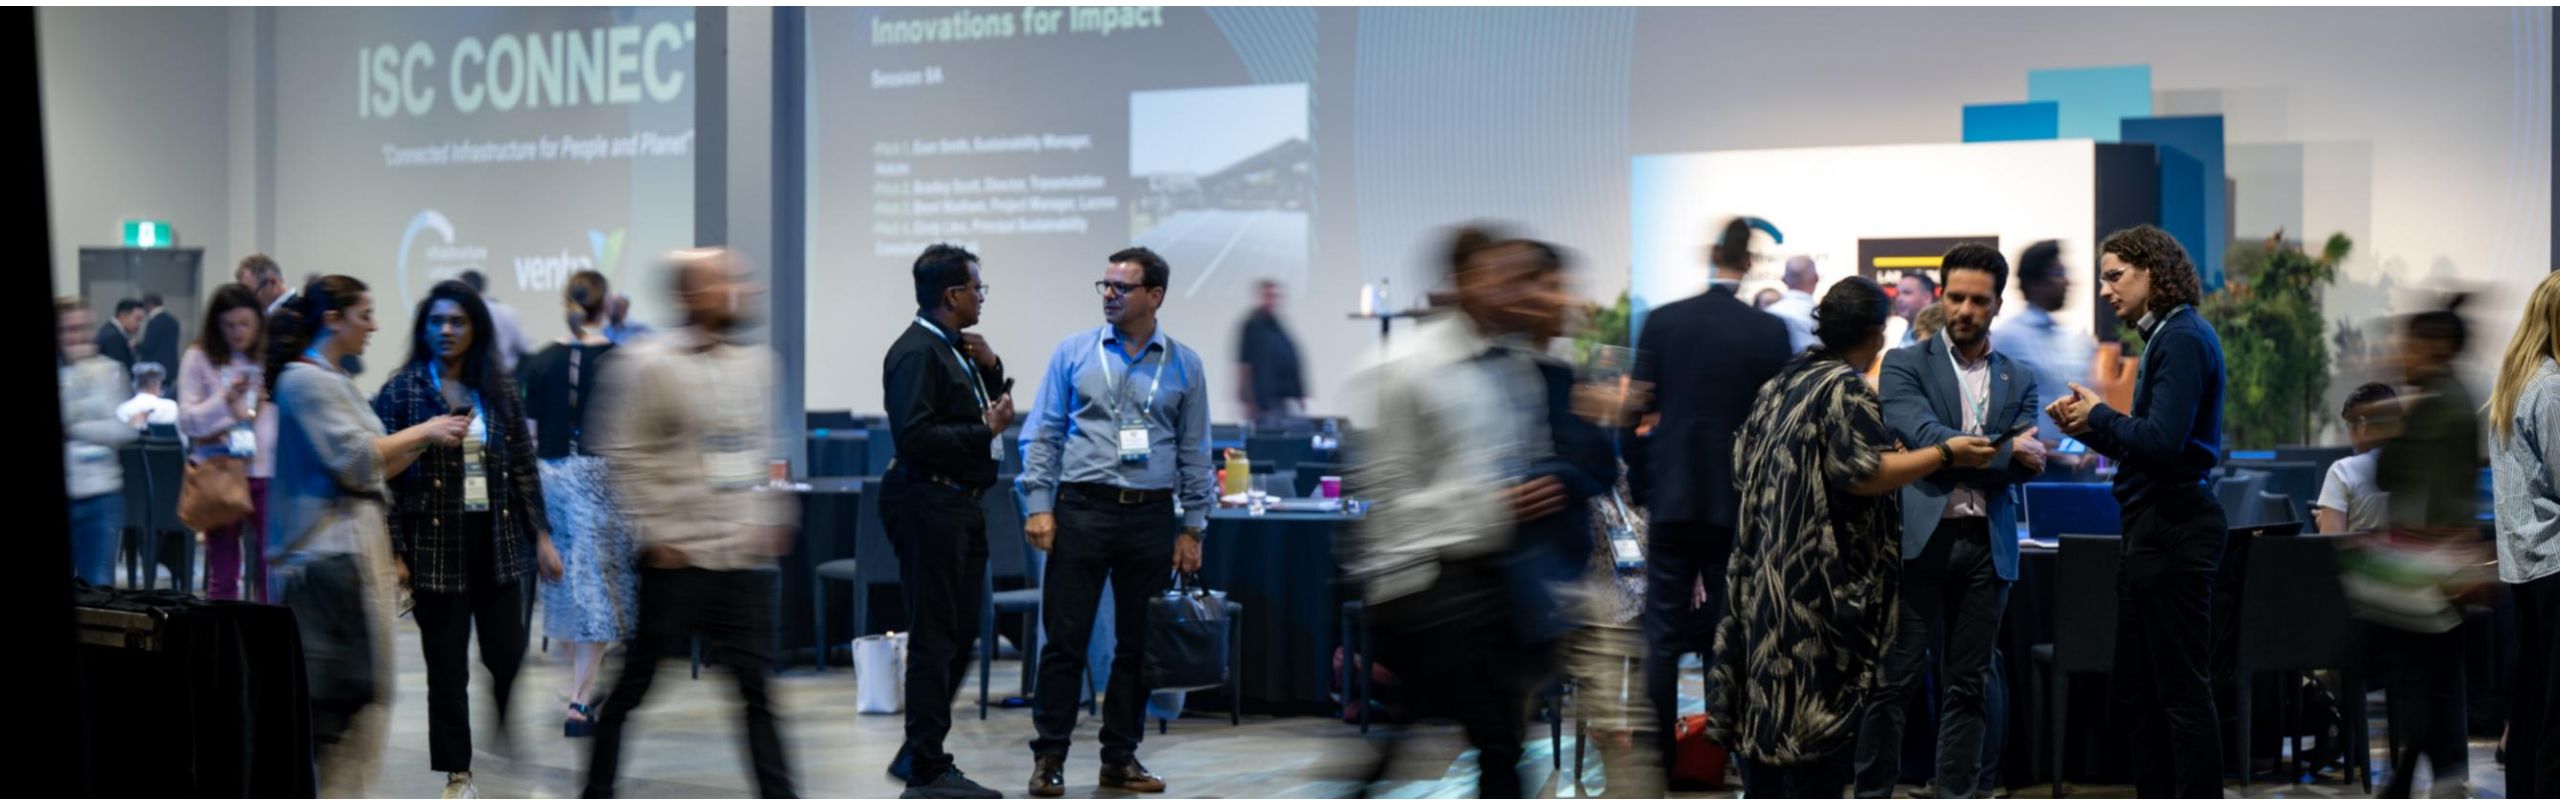

ISC Member Testimonials

“Being a member of the Infrastructure Sustainability Council enhances our ability to collaborate across the industry to tackle shared sustainability challenges. We’re proud to be pioneering the first V2 Design & As Built Rating in NSW—setting a benchmark for the water sector and reinforcing our commitment to sustainable infrastructure.”

**Gill Fowler, Delivery and Integration Director
Major Projects, Infrastructure Delivery,
Sydney Water**

“As an ISC member, we were able to showcase our solution in a Spotlight on the Supplier webinar and enjoyed a great Q&A session where we fielded questions from actual project teams across Australia and New Zealand. We also exhibited and presented at the recent Western Australia Connect Conference. This was an excellent opportunity to take a deep dive into the infrastructure sector challenges and opportunities in that unique region, as well as engage key clients.”

Adam James, Managing Director, Cerclos

Our Members

ISC’s membership of over 200 members is inclusive of all sized organisations from the government, private and for-purpose sectors.
